## **Showing some LOVE!**

February has always been known for LOVE. Did you know, according to folklore – today was originally thought to be the day on which birds chose their mates? There are many traditions and tales associated with romance during this month and our agency is getting in on the action and showing some love to the citizens of our great county.

Throughout the month of February and beyond, we may stop you at the grocery store, or in a parking lot, or maybe even at a local restaurant. But not for doing something wrong, instead to thank you for being a responsible citizen and helping to keep Citrus County safe.

Maybe you were seen wearing your seatbelt, or assisting a fellow member of our community, or being courteous on our roadways. Any small act that helps to make our county the safest in Florida. Because love isn't always about romance, but kindness you to show to others.

Keep an eye out for our flashing red hearts that remind everyone to show the love not just in February, but all year round.
